Subject: Technical Assistance Grant

Hi Ella. I was just checking in to see where we are at on the TAG. Did you get a chance to submit the requested items. Here's the list of things we previously went over:

The Contract:

- the scope of work should include providing technical assistance to communities regarding EPA's Newark Bay Study, since Newark Bay is a part of the Diamond Alkali Superfund site
- insert the following clause:

"This contract ends on 9/30/2006, unless PRC arranges for additional funding or the extension of the TAG. PRC will bear any expenses incurred by the technical adviser after the expiration date of the TAG."

- include a contract end date which coincides with the TAG expiration date = 9/30/2006
- include PRC's new contact information: address and phone/fax

Once complete, please send EPA the revised contract for our files. And then there's the other timekeeping/accounting action items that I understand you and/or your accountant were working on with Carol Hemington.

I'd like to go ahead and process this time extension but need the above items to be completed before I can do that. I appreciate your patience and persistence in this effort. Hope you're able to enjoy your summer in between all the downpours of rain!
